Tips for Working in Two-Color Brioche

- When you are working with the MC, end by putting your yarn to the opposite side and slipping the edge st.
- When you are working with the CC, the selvedge sts are worked in the same stitch in which you work the brioche stitches (i.e. if you're brioche-purling, purl the edge sts too).
- Only turn your work when both working yarns are on the same end of the needle.
- To remember what yarn to work with next, notice that the color of the wraps on the needles is the color that you worked with in the previous row.
